

Incident Lifecycle Automation in ServiceNow

PHASE 3: INCIDENT RECORD CREATION

1. Objective

The objective of Phase 3 is to create a new incident record in ServiceNow using the Service Operations Workspace and capture the required incident details for further classification, assignment, and resolution.

2. Steps to Create an Incident Record

1. Open ServiceNow.
2. Impersonate Beth Anglin.
3. Navigate to Service Operations Workspace → List → Incidents → Open.
4. Click New to create a new incident.
5. Enter the incident details in the incident creation form.
6. In Short description, enter: **Unable to connect to Corporate VPN from home office**.
7. In Caller, select: **Michael Hoefer**.
8. Click Save to create the incident record.

3. Incident Details

Field	Value
Short Description	Unable to connect to Corporate VPN from home office
Caller	Michael Hoefer
Assignment Group	Service Desk
State	New

4. Details Tab

After creating the incident, open the Details tab and verify the assignment information. The incident is assigned to the Service Desk group and can then continue through the incident lifecycle for classification, knowledge assistance, reassignment, escalation, and resolution.

5. Expected Outcome

A new incident record is successfully created in ServiceNow with the required caller, short description, and assignment information. The record is ready for the next phases of the Incident Lifecycle Automation process.
