

Incident Lifecycle Automation in ServiceNow

PHASE 4: INCIDENT CLASSIFICATION

1. Objective

The objective of Phase 4 is to update and classify the incident with accurate description, communication channel, category, subcategory, urgency, service, service offering, configuration item, and work notes. This ensures the incident is correctly categorized and ready for assignment and further resolution.

2. Updating Incident Details

1. Stay in the same incident record.
2. Go to the **Details** tab.
3. Update the following incident information:

Field	Value
Description	Michael advised he was able to connect yesterday evening, but this morning received an authentication error. The Internet works fine.
Channel	Phone
Category	Network
Subcategory	VPN
Urgency	2 - Medium
Service	Remote Access
Service Offering	Corporate VPN
Configuration Item	ThinkStationS20 (Any one)
Work Notes	Classified and assigned incident.

3. Assignment and Save

1. Click **Assign to me**.
2. Verify that the incident classification and assignment details are correct.
3. Click **Save**.

4. Expected Outcome

The incident is successfully classified with the required network and VPN information. The record is assigned to the appropriate user and saved with complete details, making it ready for the next stage of the incident lifecycle.
