

Incident Lifecycle Automation in ServiceNow

PHASE 5: KNOWLEDGE INTEGRATION

1. Objective

The objective of Phase 5 is to integrate ServiceNow Knowledge Management with the incident resolution process. Agent Assist helps support agents quickly find relevant knowledge articles based on the incident description, reducing manual search effort and improving resolution speed.

2. Agent Assist Verification

Agent Assist provides contextual recommendations while an incident is being worked on. The recommended knowledge articles are matched to the incident's short description and other available information.

3. Steps to Verify and Use Knowledge Articles

1. Click **Agent Assist** on the right-side panel.
2. Ensure that **Knowledge Articles** are selected.
3. Verify that relevant knowledge articles appear based on the incident short description.
4. Open any one of the suggested knowledge articles.
5. Click on the available rating option and mark the article as **Helpful**.
6. Click **Attach Article** to associate the useful article with the incident.
7. Add a comment such as: **Follow the steps and resolve the incident**.
8. Select **Attach Article** to complete the attachment.
9. Return to the incident and verify that the knowledge article is attached.

4. Knowledge Integration Details

Activity	Purpose
Agent Assist	Provides contextual knowledge recommendations for the incident.
Knowledge Article Selection	Displays articles relevant to the incident description.
Article Verification	Allows the agent to review the suggested solution before using it.
Helpful Rating	Provides feedback on the usefulness of the knowledge article.
Attach Article	Links the selected knowledge article to the incident record.
Resolution Guidance	Helps the support agent follow documented troubleshooting steps.

5. Benefits of Knowledge Integration

- Faster incident resolution through relevant troubleshooting guidance.
- Reduced time spent manually searching the knowledge base.
- Consistent resolution by using approved knowledge content.
- Better documentation by attaching useful articles to incidents.
- Improved knowledge reuse and support-agent productivity.

6. Expected Outcome

Relevant knowledge articles are successfully displayed through Agent Assist, verified by the support agent, and attached to the incident when useful. The incident now has documented resolution guidance and is ready for the next stage of the incident lifecycle.
